

MOLATEK FOSLICK

Class: Phosphate Trace Mineral Supplement for Ruminants
Registration no. V16059, Act 36/1947
N-FF1407

MASS: 50 kg

Molatek Foslick is a scientifically formulated, ready-mixed phosphate lick. Ideally balanced and a highly absorbable phosphate supplement, it not only provides phosphate but the animal's daily trace mineral needs as well. It contains 5% phosphate as well as the seven essential trace minerals. The supplement also contains 10% crude protein (CP) ensuring the animal receives the necessary CP requirement should the levels in the pasture drop below 8% CP, as can happen during a mid-summer drought.

ADVANTAGES:

- Highly palatable to ensure optimum intake of phosphate and trace minerals.
- Due to its protein content **Foslick** can be used in autumn.
- Highly absorbable phosphate.
- Improves utilisation of energy from green pastures/veld.
- Stimulates increased intake of grazing.
- Stimulates ovulation rate for higher calving and lambing percentages, maximising profit.
- Improves weaning weight of calves and lambs.
- Improves post-weaning growth in feedlot.

Feeding instruction: Intake per day

Sheep/Goat 25 - 50 g

Cattle 120 - 240 g

UREA WARNING

This animal feed contains an NPN source.
Mix and feed strictly according to instructions.

MOLATEK FOSBLOCK

Class: Phosphate Trace Mineral Supplement for
Ruminants Registration no. V16059,
Act 36/1947 | N-FF1407

MASS: 25 kg

Suitable for all ruminant game

Molatek Fosblock, weather-resistant block, is formulated to provide sufficient phosphate and trace mineral supplements to ruminants on green, growing pastures. Sufficient phosphate and trace mineral supplementation ensures high animal performance and profitability.

ADVANTAGES:

- Weather resistant, therefore less waste.
- Convenient, easy to handle and feed.
- Highly palatable to ensure optimum intake of phosphate and trace minerals.
- Highly absorbable phosphate.
- Improves utilisation of energy from green pastures/veld.
- Stimulates increased intake of grazing.
- Stimulates ovulation rate for higher calving and lambing percentages, maximising profit.
- Improves weaning weight of calves and lambs.
- Improves post-weaning growth in feedlot.
- Bio-degradable packaging.

Feeding instruction: Intake per day

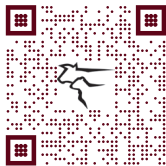

Sheep/Goat 20 - 45 g

Cattle 100 - 200 g
